

Standard Features

- ◆ Epoxy painted carbon steel tank
- ◆ PVC Surface Piping
- ◆ Electronic card based control panel
- ◆ PE brine tank
- ◆ Electric actuated butterfly valves
- ◆ Timer controlled regeneration
- ◆ Lateral diffuser (S 1800 - S 2800)
- ◆ Mushroom diffuser on platform (S 4400 - S 6300)
- ◆ Cationic softening resin

Optional Features

- ◆ AISI304 / AISI316 Stainless steel tank
- ◆ Flow control regeneration
- ◆ PLC control panel

S-1800/S125 EA

How It Works

Single softening systems are controlled with PLC controlled actuated control valves. Regeneration (regeneration) of resin reaching saturation is realized with flow control. The saline solution needed during the regeneration is prepared automatically by ensuring that the water is transferred to the brine tank in sufficient quantity.

Working conditions

- ◆ Working pressure: 2 - 6 bar
- ◆ Working temperature: 2 - 38 °C
- ◆ Power supply: 220 V / 1 phase / 50 Hz
- ◆ For pneumatic actuator valves min. air flow 100 l / min @ 8 bar
